OIL and GAS NEWS.

Joe P. Hivick who has been very busy at Healdton recently was in the city Sunday.

J. T. Sivals of the firm of Black & Bryson, was in the city yesterday from the fields.

Extending the Field.
Gunsburg & Forman are starting drilling operations in the southwest of the northwest of section 13-4-3.

Loy Childress was in from the fields Sunday and visited with Dr. and Mrs. E. C. Harlow on North Washington street.

A. J. Walker former government man but now with the Iokla Oil company was a recent business visitor to Ardmore.

J. I. Willingham who is working on some oil propositions in the Ardmore

oil district has returned from a visit with home folks in Dallas.

Material is now being unloaded at Ringling for a steel tank for the Maloney Oil and Gas company.

Hivick & Moler are drilling a water well in section 30-4-3 at the Watchorn location preparatory to beginning drilling operations.

A. Dale who has charge of production of the Carter Oil company at Healdton was here on business last night.

Producers Oil company in 26-4-3 is reported to be drilling at 1650 feet. The company will probably drill a deep test here.

Double towers are being run now on the G. E. Burford well in 12-6-2 in pulling the casing. The well has about \$8,000 worth of casing in it and diligence will be used in saving it.

R. L. Steiner has returned from a business trip to Kansas City and he expects to be in his office in the Randol hotel building now for several days.

In the Redbeds.
At the last report from the Haskell-Sinclair well in section 11-4-1 west it had 1204 feet of ten inch casing set. The drill was in the redbeds.

Spudded Water Well.
The R. B. C. Oil company is spudding a water well at its location in section 13-4-3. The luck of drilling water is creating delays in several portions of the field.

Wildcat Reports.
At the last report the following edge wells were at the depths named: Magnolia in 21-3-3 at 2200 feet, Watchorn in 7-4-2 at 1200, Watchorn in 16-5-3 at 1325, Watchorn in 20-4-3 at 1650.

Ed Sewell, a live wire of the oil fraternity whose home is in Dallas was here today. He has been spending several weeks in Tulsa and came here to look after his drilling well near Burneyville in Love county. Mr. Sewell is looking after some other propositions in this country.

The Burneyville Well.
The Ed Sewell well in section 33-7-1 west near Burneyville is drilling at a depth of about 1400 feet. The drill is in a sand rock. The last water sand was encountered at a depth of 800 feet. The owner will drill as long as the formations are favorable.

and unless oil is found shallower a deep test is very probable.

Probably Covers Small Area.
Reports from the field indicate so far that the Simpson sand covers but a small area and that area is near the center of section 15-4-3 where the big gas wells were drilled in something like two years ago.

A Good Lease.
Robert F. Scivally of the Scivally Petroleum company was in the fields yesterday accompanied by his two sons Lois and Robert F. Jr. The Scivally lease is looking much better than it did a few months ago and the prospects are that it will give up a vast amount of oil.

Home From Vacation.
Dr. J. W. Potter, Morris Sass and Andy Hardy have returned from Colorado. They made the trip in Dr. Potter's new car and report a most pleasant time. Dr. Potter and Mr. Sass are in the lease brokerage business and they will be active in their work again following their vacation.

Returns From Colorado.
C. M. Bryan, Jr., has returned from Colorado where he spent several weeks very pleasantly. He is pleased with the business, the hotel did while he was away. Mrs. Bryan and Martha Grace will be at home as soon as cooler weather has come to stay.

Tank Men Busy.
J. A. Stough and S. N. German of the Warren City Tank & Boiler company were in the city yesterday from the fields. These men are very busy building tanks at Healdton and Mr. Stough states also that his company is selling a large number of steel tanks in the Augusta field.

An Important Well.
The Oklahoma-Louisiana well in section 7-2-2 in the Graham district is waiting for underreamer cutters. It is stated that the 6.5 inch casing will be underreamed to a depth of 2725 feet and this probably means that drilling will be carried to a depth of from 3300 to 3500 feet if necessary.

Oil Under the Gas.
If heavy gas production means a big oil production as has proven to be the case in the center of section 15 the oil fraternity may begin to look out for something of interest in the Fox district. The gas production there is very heavy and is holding up well.

The Seventh Reduction.
Tulsa, Okla., Aug. 27.—A reduction of 5 cents a barrel in the price of Oklahoma and Kansas crude oil was made Saturday by the Prairie Oil and Gas company, making the new price 90 cents a barrel. This makes the seventh reduction since July 24, totaling 65 cents. One year ago the price was 75 cents a barrel.

Magnolia Cuts Price.
Dallas, Texas, Aug. 27.—A reduction of 5 cents in the price of light crude oil from Corsicana, Electric, Henrietta, Threlk, Strawn and Moran fields was posted today by the Magnolia Petroleum company, bringing the quotation to 90 cents per barrel.

Look Out For Fox.
The first well which promises to reach the sands at Fox is located in 20-4-3 and is owned by the McMan and Savoy Oil companies jointly. At the last report it was at a depth of 1770 feet and the first sand ought to be found near the 1800-foot level. An interesting report from there is expected now hourly.

Farthest Southeast Well.
Fort Ring Oil company is moving tools into its new location made in section 24-4-3. This is the farthest southeast location at Healdton and will be watched with much interest. Especially will the town of Wilson be interested in that well as it will determine whether oil production will be much closer to that city or not.

Ardmore's Deep Test.
Ardmore Oil company No. 2 on the Walker lease on the west side of section 8-4-3 is drilling at a depth between 800 and 900 feet. If the shallow sands are found here at all the drill ought to reach them today. This is to be a deep test unless a pay well is brought in at a shallower depth. Loy Childress has the contract.

Here From Austin.
U. S. Oglesby a drilling contractor

**WILL MY CHILD TAKE
DR. KING'S NEW DISCOVERY?**
The best answer is Dr. King's New Discovery itself. It's a pleasant sweet syrup, easy to take. It contains the medicines which years of experience have proven best for Coughs and Colds. Those who have used Dr. King's New Discovery longest are its best friends. Besides every bottle is guaranteed. If you don't get satisfaction you get your money back. Buy a bottle, use as directed. Keep what is left for Cough and Cold Insurance.

of Austin, Texas, is here looking over the Ardmore oil district. Mr. Oglesby says drilling has dropped off considerably in the coast country. At Humble for instance 100 rigs have been running there but at this time only 25 are busy. For each rig shut down about 15 men are out of employment and that means that work is scarce in that country.

Freak Well Holding Up.
The Skelley & Sankey well in section 31-3-3 which came in several weeks ago making oil of 37.1-2 gravity is still making high grade oil. Oil men have been expecting that the production would lose its high gravity but the well is holding out. There was a freak well in the Cushing field which belonged to White & Sinclair and which made oil of a high gravity much better than the other oils in the surrounding wells. These wells which are called freak wells have been found in several fields and there are almost as many ways of accounting for them as there are men who pass opinions. It all means that it has never been determined just why one well in a nest of wells should produce oil of a higher gravity.

Burnitt Says:
This is the day of "out of doors!" The auto has made it so! Sixty per cent of the "worth while" pass our poster displays many times a day for 255 days in the year. The best advertising brains in the world use poster displays.

Pohne Burnitt—849—let's figure! 28-3

COMPLETED GOOD WELL.

Hamon & Colcord Have a Fine Prospect in Coffey Lease.
Hamon & Colcord No. 9 on the Coffey "A" lease in 15-4-3 has been drilled into the oil sand and is making a better production than the last well which this company drilled to the Simpson sand. The first well gauged something like 700 barrels and this well will make as much as 800 and probably will reach a production of 900 barrels. These people are deepening their original gas well on the lease and it is due to reach the oil sand today.

When you yawn a good deal in the daytime, feel dull, achey and want to stretch frequently it is an unmistakable symptom of malaria, and unless you do something at once you are booked for a spell of chills. HERBINE is a chill medicine that will prevent or cure the disease. It drives out the impurities on which the malarial germ thrives, strengthens the liver and cleanses the bowels. Price 50c. Sold by Ringer Drug Co.

A PUZZLE IN FIFTEEN.

North Part of the Section Not So Promising as the Center.
McMan Oil company has well No. 10 on the Coffey lease in 15-4-3 at a depth of 1710 feet. This location in north of the center of the section where big wells are being found in the Simpson sand. It is northeast of the McGee ten acres which was purchased by Easley & Nichols. The sands have been missed so far and how deep the well will be drilled is not known. It was not begun for a deep test. Same company is rigging up to deepen No. 3 on the same lease. No. 11 on the same lease is drilling at 1300 feet. Same sands have been found but none that would make a pay well.

Nurses for Border.

Washington, Aug. 27.—The Red Cross, in response to a request of Surgeon General Gorgas of the army, today detailed fifty-five expert trained nurses for duty with the American troops on the Mexican border. Forty-five additional nurses will be ordered out later.

The cities of Columbus, Ohio; Birmingham, Ala.; Norfolk, Va.; Omaha, Neb.; Washington, D. C.; New York; Cleveland, Ohio; Atlanta, Ga.; Dallas, and San Antonio furnished the first quota of fifty-five ordered out today. These nurses will be distributed on the front as follows: Ten to Eagle Pass, thirty to Fort Sam Houston, three to Brownsville, six to Douglas, Ariz.; two to Fort Bliss and four to Laredo.

Burnitt Says:

FOUND—Sunday, watch chain, K. of P. emblem one side, I. O. O. F. on reverse side. Owner call at Ardmoreite and pay for advertisement. 28-3

MOVIES NOT A NECESSITY.

Commission Has no Jurisdiction Over Alleged Film Combine.
Oklahoma City, Okla., Aug. 27.—"We find that a picture show is not a service or commodity which the public must use." This is from an opinion by the Oklahoma Corporation Commission disclaiming jurisdiction over alleged violation of the state anti-trust laws by film companies. The hearing was had months ago. The order was made today.

Complaint was made by R. H. Powell, as president of the Motion Picture Exhibitors' League of America, and others against the Mutual Film Corporation, General Film company and Universal Film and Supply company. It is alleged that the defendants had entered into a conspiracy in restraint of trade to control the price and exhibition of films in moving picture shows in Oklahoma.

The hearing developed that there was a uniformity of prices and rules as to leasing films. The commission has now decided that, whatever the facts of the case may be, that body has no jurisdiction over the subject matter under the law, for the reason that its jurisdiction is confined to cases wherein the commodity is one which the public must use. The commission holds that the public may be able to worry along without film shows.

CLEAR SKIN COMES FROM WITHIN

It is foolish to think you can gain a good clear complexion by the use of face powder. Get at the root of the trouble and thoroughly cleanse the system with a treatment of Dr. King's New Life Pills. Gentle and mild in action, do not gripe, yet they relieve the liver by their action on the bowels. Good for young, adults and aged. Go after a clear complexion today. 25c at your druggist.

Wanted—Settled production from 100 barrels and up. Also would like to hear from producers who would be interested in combining their production with building of refinery and pipe line. We have Chicago capital interested. Terry & Brinkley, Guthrie, Okla. 9-11

PEARY RETITERATES CLAIMS.

Arctic Explorer is Confident He Saw Crocker Land.

New York, Aug. 27.—Rear Admiral Robert E. Peary reiterates his confidence in the existence of Crocker Land and his belief that he saw it in July, 1916. The admiral's statement, telegraphed to the Tribune from his summer place in Maine was called forth by the fact that Ensign Fitzhugh Green, the naval officer assigned to the MacMillan Crocker Land Arctic expedition, made no report of whether the expedition found Crocker Land in announcing to the navy department his arrival at Copenhagen in April, last.

Quoting from his original narrative, Mr. Peary said:
"It may be that MacMillan and I were both misled by the nearly permanent clouds of condensation over persistent lanes of water, or unusual refraction which occurs in the Arctic regions may have lifted into view land that was in reality well below

the horizon, and my estimate of the distance of Crocker Land may have been too moderate. It is well to await completion of Stefansson's discoveries before dismissing Crocker Land."

Cure for Cholera Morbus.
"When our little boy, now seven years old, was a baby he was cured of cholera morbus by Chamberlain's Colic, Cholera and Diarrhoea Remedy," writes Mrs. Sidney Simmons, Fair Haven, N. Y. "Since then other members of my family have used this valuable medicine for colic and bowel troubles with good satisfaction and I gladly endorse it as a remedy of exceptional merit." Obtainable everywhere.

Burnitt Says:
Never in the history of the city of Ardmore when outdoor advertising pulled so well! Everybody sees the poster boards!

Phone Burnitt—849—let's figure! 28-3

CHANGES IN RESERVE BANK ACT

Washington, Aug. 27.—The conference report on amendments to the Federal Reserve Act permitting national banking association to establish foreign agencies, liberalizing discount regulations and permitting member banks in small towns to handle insurance was agreed to today by the senate. The house is expected to accept it within a few days.

The Best Laxative.
To keep the bowels regular the best laxative is outdoor exercise. Drink a full glass of water half an hour before breakfast and eat an abundance of fruit and vegetables, also establish a regular habit and be sure that your bowels move once each day. When a medicine is needed take Chamberlain's Tablets. They are pleasant to take and mild and gentle in effect. Obtainable everywhere.

BIG SHIPPING DAY AT NEW YORK

New York, Aug. 27.—Departure today of six transatlantic passenger liners, in addition to a large number of freight ships, made this one of the biggest sailing days from this port since the war began. The liners were the Kristianafjord for Bergen, the St. Paul for Liverpool, Lafayette for Bordeaux, Stockholm for Gothenburg, Saxonia for Liverpool and California for Glasgow.

A total of forty-eight ships were cleared.
